IMA HR:

I wish to express my interest for the Software Developer position at the IMA Lab. Having discussed the IMA Lab and their projects a few times with one of the team members, I was excited to see a position which I feel I am a solid fit for. Not only do I believe that I have the skills required for the position, but I think our culture and philosophies will mesh quite well.

I am always learning new things and try to keep up-to-date of all the new happenings in the tech world. I also try to give back to the (mostly open source) community by attending Meetups, assisting in IRC and forums, along with contributing to projects where I can.

Besides having a strong interest in cinema and photography (as shown by my B.A. in Cinematography) I also regularly visit the Garfield Park Arts Center and Indianapolis Repertory Theatre. While living in Chicago, I spent a great many Tuesday afternoons at the Art Institute. Living in L.A. gave me the opportunity to visit the Getty (where I saw a fantastic talk by Errol Morris and Ricky Jay), see the Philip Glass Orchestra perform *Powaqqatsi*, and hours of the Fringe Festival. I also had the privilege of attending Documenta13 last year in Kassel, Germany.

On my resume you will notice a recent employment gap and I would be more than happy to discuss this in detail in person. I will say, however, that after several untimely family events, a cross-country move, and working towards a career change, I am more excited at the opportunity to get back to a steady career.

I look forward to hearing from you,

Cameron Dershem

P.S. I frequent the Major Taylor Velodrome and am excited for the opportunity to

work across the street.
